

Q-LS-05

Q : Can KSS predict the Basic Rating Life of Lead Screws?

Unfortunately we cannot.

KSS cannot provide the calculated Life of Lead Screws, like Ball Screws. Lead Screws have a lot of unpredicted factors, such as material, flank profile, square measure of contact surface, Lubrication and so on.

That is the reason why Lead Screws do not have a theoretical formula of Basic Rating Life.

KSS will make a decision whether it is usable or not based on our durable test data on various factors.
