

# Q&A

Question:

## What kind of V-Z- $\theta$ Actuators does KSS have?

There are three (3) types, which are Direct Drive type, Hybrid Drive type and Belt Drive type shown below.

【Direct Drive】

This Actuator design realized its slim body by driving a Ball Screw and a Ball Spline Nut directly built in a Hollow Motor.

【Hybrid Drive】

This Actuator applied design which are combined of the Hollow Motor and Normal Motor, gives short length of Actuator height.

【Belt Drive】

Wide variety of Motor can be set on this Actuator. This means various options are available based on Motor Specifications.

Provides variety of Actuator types based on Motor combination.
